

DSP1230 DSP1230L

300W Outdoor Horn Speaker

Description

The DSP1230 / DSP1230L are 300W constant voltage / constant resistance outdoor horn speakers featuring professional HF and LF drivers, offering high speech intelligibility and a 500m transmission distance, ideal for sports venues and extreme climates, with an IP66 waterproof rating and durable glass fiber enclosure.

Features

- 2-way High-power outdoor long-throw horn speaker, adopting professional HF LF drivers, with efficient sound transmission, strong penetration, high speech restoration characteristics.
- Cabinet is made of glass fiber, which is waterproof, anti-corrosion, and resistant to hydrochloric acid. Suitable for various extreme climates and environments.
- Widely used in sports venues, schools, training grounds, air defense alerts, beaches, highways, etc.

Specifications

Model	DSP1230	DSP1230L
Rated Power	300W	
Driver Unit	HF:1*1"Throat/1*3" voice coil,170mm Magnet; LF: 1*12inch/ 2.5"voice coil,156mm Magnet;	
Impedance	100V	8Ω
Frequency Response (±3dB)	70Hz-20KHz	
Sensitivity (1W/1m)	104dB	
Max. SPL	130dB	
Dispersion	50x90	
Handling Power	300W(RMS)/600W(PEAK)	
Transmission Distance	500m	
Connector	2xNeutrik Speakon NL4	
Dimension	430*430*460mm	
Net Weight	22±2Kg	
Waterproof Level	IP66	

Installation Step
